Program Services

Achievement	Pgm. Svc. Exp.
<p>Environmental Programs, General/Other Green Technology Mission - This Foundation initiative was established to help government create clean and sustainable communities. It has several purposes: * To promote solutions - products, processes and services - that will bring about clean and sustainable communities; * To create jobs that relate to building clean and sustainable communities; * To foster the development of new technologies and new career opportunities by popularizing implementation of state and local sustainability programs. Activities - In March 2007, Green Technology organized the first Green California Summit and Exposition, a statewide event focused on state and local government sustainability programs, and the products and services that could help ensure the success of these programs. The development of the event was guided by an Advisory Board comprised of senior officials from California government. The Summit exceeded all expectations, and brought thousands of government officials to Sacramento for three days of exhibitions, training and educational sessions. During the process of organizing the Summit, representatives of the office of the Secretary of Education requested assistance from Green Technology in supporting efforts to green California's public schools. In response to this request, Green Technology organized the Green California Schools Summit. This event, which took place in Pasadena, California in December 2007, emerged as the nation's largest conference dedicated solely to the emerging green schools movement. It brought together experts and practitioners in fields ranging from design and energy efficiency to curriculum and "green lunch" programs. The Advisory Board was chaired by state officials responsible for funding and approving the design of the state's public schools, as well as the Governor's Secretary of Education. Special issues of Green Technology magazine were published for both events, and distributed to attendees. The magazine also began regular publication of an electronic "newsletter" featuring new editorial content. At the request of advisors and public sector officials, Green Technology began the planning for a third annual event, the Green California Community Colleges Summit. This statewide conference addresses the unique needs of this educational community, which is home to some of the largest public sector green building initiatives in the country and is also being looked to as a primary source of trained, skilled workers to fill jobs in the "green economy." To support these efforts, Green Technology staff undertook an ongoing series of meetings with state and local officials, as well as attending key conferences and events focused on energy, green building and design. <p>Education, General/Other Improving Mathematics and Science Education Each year, this country's high tech industries must import tens of thousands of workers, to fill jobs for which they can find no qualified American graduates. In an economy driven by technological innovation, skills in science and mathematics are essential. While there are signs of improvement, American students continue to lag behind their counterparts in other developed countries. The Foundation has produced more than 70 educational video programs designed to invigorate mathematics and science instruction. These programs are designed to answer the question, "Why do I need to learn this?" By introducing students to hundreds of professionals, working in fields ranging from ocean exploration to fashion design, they raise student awareness of the astonishing variety of applications for math and science concepts. These materials have received more than 150 awards, and have three times received the highest honor in broadcasting, The George Foster Peabody Award. Independent studies have verified that when they are integrated into classroom teaching, FASE programs have a dramatic impact on student interest in mathematics and science. They have also been shown to improve student performance. FASE has also produced some of America's most widely-used staff development videos. At schools throughout the country, principals and staff development specialists use the FASE documentary "Good Morning Miss Toliver" to inspire and motivate teachers, and to demonstrate how a master teacher develops "mathematical thinking" in her students. The series "Teacher Talk," also featuring Presidential and Disney award winner Kay Toliver, has been used to help teachers at districts throughout the country develop the ability to deliver lessons that engage student interest and attention. As an ongoing activity, Foundation staff work to ensure that teachers are aware of these materials and that they are implemented in programs to improve student performance and teacher skill. In addition to video materials, over the years the Foundation has developed a variety of teacher training activities, ranging from workshops to multi-day institutes. Environmental Health Programs Environmental Health Pesticide Project - Since 1990, the Foundation has \$93,725 00

been the primary public record source of detailed information on the export of banned and other hazardous pesticides from U S ports. The project has focused on shipments of such products to ports in the developing world, where pesticide over-use, unsafe storage practices and lack of appropriate protective equipment greatly increase their risk. During this year, Foundation staff worked with the editors and reviewers for the International Journal of Occupational and Environmental Health (IJOEH) to ready a new export paper for publication. Project staff continued to reply to requests for information regarding export trends and to distribute series on the Precautionary Principle and the human rights dimensions of hazardous chemicals trade, series developed at the request of IJOEH and published in that journal. **Body Burden** - As part of ongoing efforts to add to understanding of the effects of fat-stored chemicals on health, FASE staff and associates continued efforts to document the health consequences of exposures and the possibilities for relieving them. Compilation of data from 100 case folders was used to inform the submission of a grant to the National Institutes of Health Center for Complimentary Medicine in coordination with researchers at the University at Albany, NY, to conduct a study of rescue workers exposed to toxic chemicals at the World Trade Center. FASE associates also published a report on a small group of such cases in the journal Chemosphere. **Drug Rehabilitation** - The Substance Abuse and Mental Health Services Administration (SAMSHA) has advocated for routine outcome monitoring as an important component of treatment quality management for nearly two decades. A four-year demonstration project was completed that resulted in a psychometrically-validated survey that shows key outcomes obtained at centers offering the Narconon drug rehabilitation program. The project included the development of a written procedure manual describing the use of the survey by rehabilitation programs for routine outcome measurement. **Meth Cops Project** - FASE staff provided assistance to physicians and state officials in Utah for the establishment of a project that could provide detoxification services to police officers exposed to toxic chemicals in the course of raids on illegal methamphetamine laboratories. This included assistance in the development of procedures to collect data regarding the health consequences of these exposures and the impact of detoxification therapy on their severity. **New York Rescue Workers Detoxification Project** - By the end of 2007, this project had enabled well over 800 rescue workers in New York City to overcome the debilitating effects of toxic exposures during the WTC rescue and recovery operations. Established in 2002 at the request of union officials and rescue workers in New York, this independent non-profit project is focused on restoring quality of life and job fitness. Services are provided to rescue workers at no cost, supported by donations from individual, corporation, foundation and government donors. FASE staff assisted the project several ways, including consulting on routine outcome monitoring, facilitating research efforts and administrative support. During 2007, city officials investigating the health consequences of WTC-related exposures and the efficacy of the public health response to the disaster called for testimony of project staff and completions in three separate City Hall hearings. FASE staff assisted in gathering data requested by the city and in preparation of testimony. Fundraising FASE provided significant support for two fundraising events for the New York project. An April event in New York City, chaired by project co-founder Tom Cruise, with support from New York police unions, raised more than \$1 million. A November event, held in Las Vegas in partnership with Usher's New Look, a charity that is assisting victims of Hurricane Katrina, raised \$500,000 to be shared between the two groups. The partnership with Usher will continue into the future, with plans for broader outreach (e.g., a concert) and a significantly higher fundraising target. **Gulf War Exposures - Persian Gulf War Veterans** - Foundation staff served as consultants to the establishment of a non-profit project intended to address the persistent symptoms of veterans exposed to chemical weapons, pesticides and other environmental contaminants during the Persian Gulf War. In part, the project is a response to a final report and recommendation from a planning conference hosted by the Center for Disease Control (CDC), the U S Department of Health and Human Services' Office of Public Health and Science, the National Institutes of Health, and the Agency for Toxic Substances and Disease Registry to conduct a treatment trial to examine the benefits of detoxification for Gulf War veterans. In response to this recommendation, in 2007 FASE staff collaborated with researchers in Florida and Washington, DC on an invited proposal to the U S Dept of Defense for a project that would examine the benefits of sauna detoxification for veterans manifesting "Gulf War syndrome" (5500 Persons)
