TRAINING AND OT WEEK FREEWINDS 5TH ANNIVERSARY CRUISE

Setting course for New OT IX and X

In June of 1993, top SCIENTOLOGY International Management executives and the largest gathering of New OT Villis ever assembled in one place, came aboard the FREEWINDS® in sunny Acapulco, Mexico, beginning a week-long cruise that would kick open the door to the release of New OT IX and X.

280 SCIENTOLOGISTS™ attended the cruise, including 216 New OT Villis! They came from all over the world: Malaysia, Canada, Australia, South Africa, France, Italy, Austria, Holland, England, Switzerland and the United States and, of course, Mexico.

This 5th Anniversary cruise, "Training and OT Week," had a very special purpose: to pave the way for the release of New OT IX and X for OTs and for all SCIENTOLOGISTS.

The Anniversary cruise began with a fabulous send off by the city of Acapulco, a large, bustling city of 2 million.

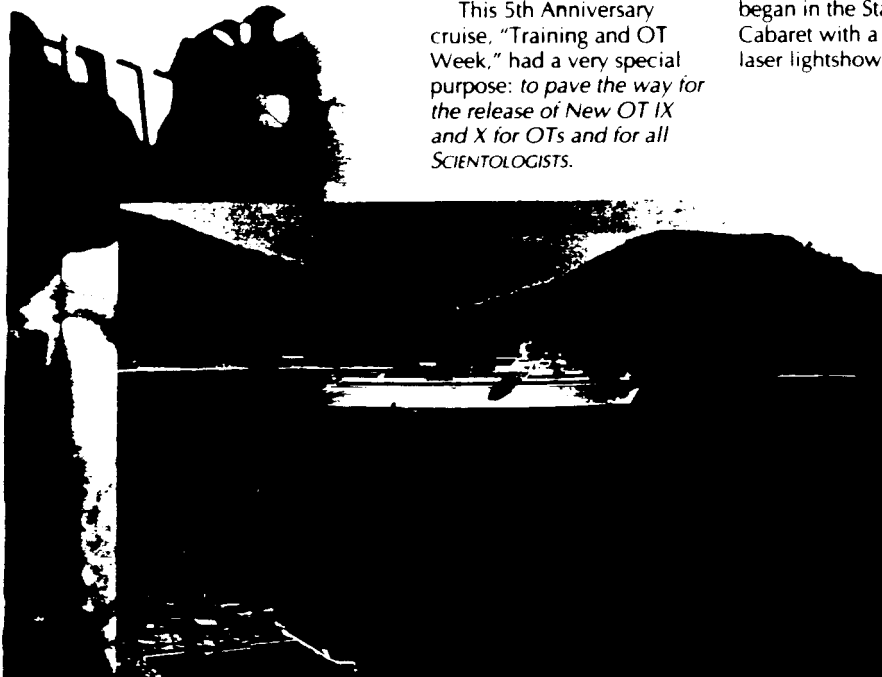

The FREEWINDS was honored with the biggest event ever staged by the city! The festivities included a parade down the main thoroughfare to the FREEWINDS, a series of local dancing groups and bands performing alongside the ship, the famed Acapulco cliff divers, and 1,600 children from all over the city.

As the ship left the harbor, she was escorted by 50 boats and jet skis.

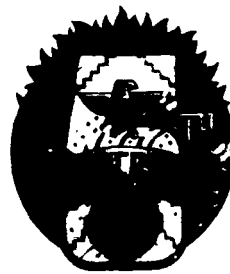

Once the FREEWINDS was out to sea, the opening event began in the Starlight Cabaret with a breathtaking laser lightshow.

For the 5th Anniversary of the Maiden Voyage, the FREEWINDS cruised to different ports on the west coast of Mexico. The week began in Acapulco, with a fabulous send-off by the city of Acapulco. There was a parade in honor of the FREEWINDS, many dockside performers and an escort as the ship left the harbor.

FREEWINDS 3 ISSUE 11

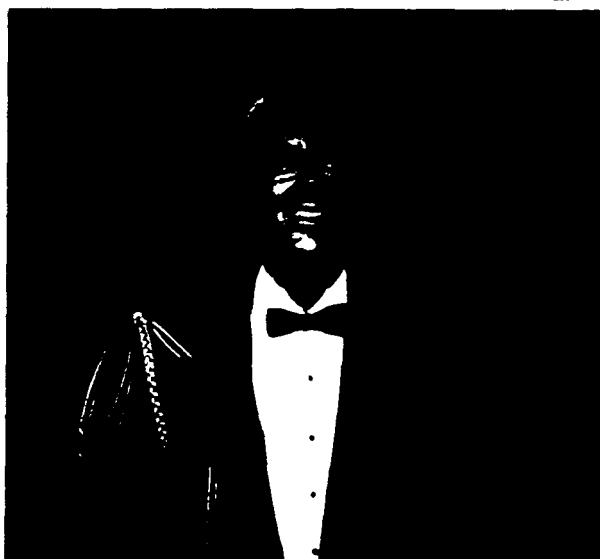

FSO to create a whole new scene so that many, many SCIENTOLOGISTS can move up the line to OT at Flag. Mr. Miscavige's talk was illustrated with slides of Flag's incredible new Advanced Org in the Sandcastle.

The Commanding Officer CMO International, Captain Marc Yager, then briefed the audience about current planetary dissemination and org-building activities around the world. He went over the many actions underway to create huge expansion and Saint Hill-size orgs internationally, including campaigns for DIANETICS and SCIENTOLOGY on an international level, the training of executive teams for each org, and the renovations work done in LA Org, AOSH Europe & Africa and AOSH ANZO.

Commander Ray Mithoff, Senior Case Supervisor International, then covered the need for training for anyone to make it to full OT, and explained that it is vital that one be able to *think* with the tech in order to instantly handle anything that comes up on New OT IX and X.

Commander Mithoff then announced a new service geared to helping all SCIENTOLOGISTS on their route to New OT IX and X: the "Auditor Update Service." This service was a key activity for attendees on the cruise and was personally supervised by Senior C/S Int and his staff.

Throughout the week, attendees participated in the Auditor Update Service, taking exams up to their level of training, checking out on their auditor skills and receiving individual study programs that would get them fully up to date on their tech.

(top) Chairman of the Board Religious Technology Center, Captain David Miscavige. (lower left) The events of the week began with a laser lightshow. (above right) Senior C/S International, Commander Ray Mithoff.

The master of ceremonies for the opening evening was Chairman of the Board Religious Technology Center, Captain David Miscavige. Mr. Miscavige introduced the purpose and activities of the week, outlining the four requirements for the release of New OT IX and X and the latest developments on these. These requirements are detailed on page 6.

Through the opening evening, other top International Management executives gave an overview of the actions being taken to make the release of New OT IX and X possible – and the part OTs play in this.

Executive Director International, Captain Guillaume Lesèvre, covered the latest expansion news internationally, from Russia, to

Narconon in Italy, to *The Way to Happiness* activities in Spain. He then presented the annual OT Achievement Award to New OT VIII Holger Hackenjos from Hamburg, Germany, for outstanding contributions in the expansion of SCIENTOLOGY.

Captain Miscavige then briefed the audience on the recent actions taken by International Management in the

A highlight of Mr. Mithoff's speech was the release of a fabulous new OT lecture series and OT Hatting Course, "Exteriorization and the Phenomena of Space." With 84 lectures, this series is the most comprehensive collection of LRH™ data on exteriorization there is! Every SCIENTOLOGIST needs to know *all* the tech to make it to OT, including the data on each and every one of the OT lecture series. Giving an inside look at upper levels, Mr. Mithoff explained that a person will reach a point on the OT³ levels where it is vitally necessary to be stably exterior.

On the second day of the cruise, the ship arrived in the Mexican port of Zihuatanejo. Most of the passengers began on the first steps of their Auditor Update Service, under the supervision of Senior C/S International and his staff. The activities of the Auditor Update Service continued during the day throughout the week.

That evening Chairman of the Board RTC gave a briefing on the LRH Technical Films. The evening was capped with a concert by Jonnie Laboriel, a SCIENTOLOGIST and famous star in Mexico.

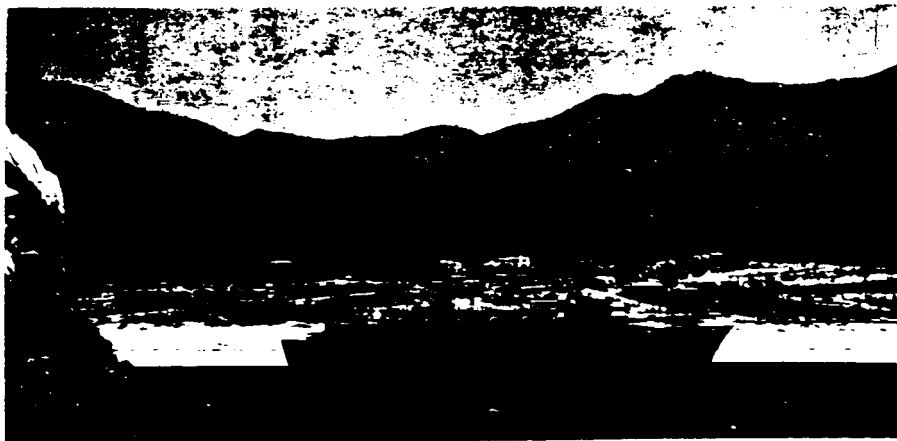

On the third day of the cruise the ship docked in Manzanillo. Throughout the day, the Auditor Update Service continued. That evening the traditional International Association of SCIENTOLOGISTS Patron Ball was held. Guests were briefed by President of the Church of Scientology International, Heber Jentzsch, on the recent wins against the psychs, and each received a new brochure, "Psychiatry's Multi-Billion Dollar Fraud," and a copy of the LRH Tribute video.

On day four the ship docked in Puerto Vallarta. That evening a concert was given ashore to local residents by the Golden Era Musicians.

On the fifth day of the cruise, the ship was at

(above) On the first night of the Anniversary Voyage, Commanding Officer CMO International, Captain Marc Yager, briefed the audience on current planetary dissemination and org-building activities underway. (top right) The FREEWINDS visited several ports on the west coast of Mexico, which ranged from big cities to quiet fishing villages. (near right) Fields Executive International, Commander Sherry Murphy, worked with SCIENTOLOGISTS on dissemination drilling. (far right) Throughout the cruise, SCIENTOLOGISTS enjoyed great dining, gala parties and a grand time spent with friends. (below) The FREEWINDS in one of the exotic Mexican ports.

FREEWINDS 5 ISSUE 11

sea and a very special seminar was held in the afternoon. Here was announced a key part of the preparations for the release of New OT IX and X: all of the New OT VIIIs aboard were appointed "OT Ambassadors." OT Ambassadors have the duty to help ensure that there will be enough people ready in time for the release of New OT IX - through New OT VIII, complete on all training requirements and fully prepared for New OT IX. One of their actions will be to contact OTs in their area to get them onto training and moving up THE BRIDGE.

On the sixth day of the cruise, the ship was in Cabo San Lucas at the southern tip of Baja California and the Auditor Update Service activities continued.

That evening, Commander Norman Starkey, Trustee, briefed the passengers on the ongoing project to preserve DIANETICS and SCIENTOLOGY technology forever. All passengers received a kit containing Ron's Journal 39 on an archival metal record.

For the seventh and final day of the week's events the ship was in Mazatlan.

At the finale event held Saturday evening, a special Sea Org slide show was presented, giving a chronological record of the achievements of the Sea Org over its 25 years in existence. Passengers were presented with a Sea Org campaign bar for their participation in the "Training and OT" activities of the week on the ship. Final entertainment of the cruise was a Broadway Show performed by the Golden Era Musicians.

The focus of the events and activities of the week can be summarized as: BECOME A TRAINED OT.

No matter where you are on The Bridge COME TO THE FREEWINDS NOW AND MAKE IT TO OT FASTER!

Every SCIENTOLOGIST plays a part in the release of New OT IX and X by getting themselves up THE BRIDGE to Clear and OT as well as getting trained.

The FREEWINDS has a role of helping SCIENTOLOGISTS at all levels of THE BRIDGE to achieve this.

YOU DO NOT HAVE TO BE OT TO COME TO THE FREEWINDS.

The FREEWINDS has a series of special courses available to all SCIENTOLOGISTS. These courses are based on lectures given by LRH on the subject of OT. As covered by Chairman of the Board RTC on the page opposite, to make it to OT, you need to know everything from BOOK ONE to the latest

modern breakthroughs. This includes the data on OT Hatting Courses.

By knowing the data now, you will make it to OT faster as proven time after time by SCIENTOLOGISTS at all points of THE BRIDGE.

"My wife and I had been stalled Clears for ten years. I went to the FREEWINDS and did the Route to Infinity Course. Since we went to the ship, my wife has reached New OT VII and I am preparing to start New OT VII as well." - R.A.

"Two years ago I was a stalled Clear - eight years worth of stalled. My wife and I went to the FREEWINDS where I studied the Route to

Infinity Course. Just six months later I was auditing on New OT VII! The amazing aspect of our time on the FREEWINDS was that I 'became' an OT while there." - P.L.C.

"Going to the ship and experiencing the OT environment really changed my life.

"Prior to going to the FREEWINDS, I was a stalled Clear of eight years. While on the ship and doing OT Hatting Courses, something happened to me that was better than a couple of intensives. I rekindled my failed purposes on getting

up THE BRIDGE to full OT. And I knew I could do it.

"When I got home I had changed. Together my husband and I decided we had to change the business. We started making a lot of money.

"We now have a successful business and own our own home as well. And now I am auditing on New OT VII!

"Going to the FREEWINDS and doing OT Hatting Courses really handled what was wrong in my life. I recommend that you try it too." - J.P.

THETAN MOTION & IMPLOSIONS

by L. Ron Hubbard

The following article is from the lecture "Thinking Processes" of 13 October 1953, from the LRH lecture series Exteriorization and the Phenomena of Space, released on the FREEWINDS 5th Anniversary cruise.

I am displaying to you the complete anatomy of a trap called "MEST universe."

Let's take a box of matches and let's consider the perception of light. What's light do to that box of matches? It's a very simple answer. It comes in and hits it and a little bit of it glances off. Remember, it comes in and then a little bit of what's hit glances off. There's a lot more lightwaves coming in and hitting this box than there are departing from the box.

Therefore, the main force vector with relation to this box is a vector arrow pointed in from 360 degrees of a sphere. And a little bit of that's escaping. But it's escaping into what? New force vectors coming in which are stronger than the escaping vector.

There's such a thing as a dark star. Dark stars are not nonburning stars. They are burning red, but the electrons are no longer able to escape their field of gravity and so they no longer can emanate light. Gravity itself can bring them back. It can't emanate anymore because it has enough mass to attract back into itself anything it tries to get rid of.

There's no real essential difference between a planet and a man or a star and a man. He himself is as well off as he can emanate theta-wise.

If you get him to fighting lightwaves and he starts to put out his own flitter – if he has been made to fight and match the wavelength of lightwaves – he'll no longer put out flitter because it is going

out against a continual impact of incoming lightwaves. He will go into the situation where he's trying to get rid of the lightwaves after a while, and trying to turn them around so they will go back out again.

I call your attention now to the Axioms: the received motion and the push-out again of that motion. We are above this level of the Axioms. Theta receives a motion and pushes it back out again. It has stopped using its own horsepower and is using pictures of lightwaves. Now it's already entered into human beingness. The Axioms are designed to delineate what human beings are doing. Thetans have stopped emanating their own energy in favor of trying to get rid of energy which they have received.

Let's go a little further now. Any sense perception hits in, in strength and goes out in weakness, so that a thetan begins to believe, after a while, that any force directed at him is strength and any force which he directs is weak. All he's done is fought the MEST universe to a point where he's gotten this kind of a computation.

There's a reverse of this. Out in the vacuum of space a thetan doesn't have enough horsepower, when he gets pretty weak, to pull back in what the vacuum is taking away from him. If he has more pressure where he is than the vacuum around him, we've got an explosion. But if we come down on a planet we have *implosions*. A thetan in space is extroverted perforce and on a planet introverted perforce. Even so, out in space, it isn't cancelling because he's being hit with what we call cosmic rays. He's being hit with meteorites, dust, and so on. And all of this is operating just the same as the

lightwaves again. So it's only a slight bit that that vacuum assists him. Once more: any incoming wave. He actually gets into a sort of a self-clearing operation, though, if he gets out into space good and solidly. The space will take it all away from him.

Let's take this 360-degree sphere and find out that a thetan in this universe is in a manufactured trap which first gets him to desire these incoming waves, then gets him to fight them so that they fight back, and then gets him to a point where he'll inhibit their coming in.

As soon as you get him to inhibit their coming in, he gets into a pattern that looks like a shell. The type of violence which matches it is an implosion where all on the perimeter collapses into the center. And that's a thinking machine.

Here's a fellow going around occupying a geographical locale – a body. Lightwaves are hitting this body and bouncing off of it, but more hit than bounce away. That's a fact. You can take them off in chunks, but they don't bounce away.

What does this mean? It means that the ambition of the thetan who has been in this universe any length of time at all is to hide, get into a cave or a head, and let these lightwaves bounce off a face or a skull in preference to hitting him because he thinks he's on the same wavelength as this universe and has no other wavelength.

Now, there is the occluded case, pure and simple. It has no more complications than those mechanics. The individual has ceased to put out – generate – his own energy to any marked degree and has become dependent upon MEST energy to a

marked degree. Then he's taking facsimiles of this MEST energy and he's using *them* to redirect his motion and to remember and to do everything. He has become dependent upon this universe and so patterns all of his actions with this universe and, who knows, may someday become a police officer.

Police action is nothing more nor less than MEST universe action. It's just: Hold them still; put them in a box; don't let them out; hold motion.

Force is motion. When you want to inhibit the force of an individual, all you have to do is inhibit his motion.

thinks that it is under continual bombardment which is driving it in on him. So he can't be anything. So he thinks he is nothing. And there's your basic explanation of why the thetan, in each case, says, "I'm not here. I'm just a body." He thinks he's nothing.

It was quite a job digging up the answer to this riddle because he has come into a desire for some of the damndest things. The MEST universe has bombarded him on a 360-degree sphere inward long enough so that he desires to be the center of attraction. It isn't natural at all. A thetan does *not*

poses culturally a slow motion on an individual.

The only excuse we have in Scientology for handling an education pattern is we're all more or less agreed on an education pattern, so we are in communication on that basis. But the total subject of our education is speeding up motion and undoing education which makes it very, very acceptable.

The problem on Earth would be that you are looking at an implosion happening. Not one that is obviously *going* to happen; you're looking at one *happening*. People fight shy of this problem, which is a demonstration of two things. That the answer to the problem, if it is the answer, has to be made more complicated than it is. The other thing that it's a demonstration of is that the MEST universe doesn't want you to reach out for any data or get out in any direction whatsoever. People become hectically in motion as a protest. People become sedentary as a surrender. And they'll go through this cycle. They get hectically in motion, then they go through surrender.

You're not going to solve this with thinkingness because it's a problem of motion.

There are two answers to it. One is to subjectively free up and re-create the ability of the thetan to create and use his own energy. That's one problem answer. That is the answer to Subjective Processing. The other is Objective Processing. Get him so used to this universe, so accustomed to what's coming in, that it doesn't worry him and, objectively, get him up to a level of motion by geographical drills whereby he stops moving like MEST particles and starts being in different places like a thetan.

There are four directions of motion: one is outgoing, the second is inhibiting outgoing, the next one is incoming and the next one is – from outside – inhibiting incoming. Your exterior source incomes and inhibits incomes, and the source of the other vector line of motion is outgoing and inhibiting outgoing. There are two other factors – let go and grasp; in other words, start and stop. Let go and grasp for a thetan is more explanatory.

But these four vectors of motion are sufficient to upset the stops because none of your stops are exactly balanced stops. They can always be imbalanced. The only complete stop would be complete absolute zero, which is a theoretical unobtainable. The complete hold would be a complete all-MEST, which is again unobtainable. So these things upset.

As long as a thetan can't mock up

"There's no real essential difference between a planet and a man or a star and a man. He himself is as well off as he can emanate theta-wise."

If you want to inhibit his motion, you tell him force is bad. "He who dies by the sword, lives by the sword," or something of the sort. And then neglect to tell him that "He who doesn't live by the sword dies a lot quicker." We've got "force is bad, force is bad, force is bad."

Now, the thetan has one wonderful automatic mechanism which takes care of force. The force which is built up upon him is actually not in the form of electrons and molecules. It's the pictures he takes of the electrons and molecules. Why does he take pictures? Totally automatic mechanism. He starts fighting this stuff coming in with his own force and it makes a picture. He resists. Then he gets so he believes he wants this stuff. We've got desire taking place after an inhibition has taken place.

He has been inhibited from having something long enough so that he craves it. And that's desire. Anytime you want somebody to really crave something, inhibit them from having it – a long time. He'll go into apathy about it and fluctuate around about it, but that's only at the bottom of the scale. And that's where it finally leads him.

The thetan, to all intents and purposes, stands in the middle of a continuous bombardment which reduces him smaller and smaller and smaller. Now, a thetan can be what he can see. And, by golly, he can't put anything out far enough to see it if he

want to be seen. He has no desire to be seen. His basic desire is to put something out to be seen. So, you see, in this universe he's right there being hammered and pounded and the first thing you know, he's got to be the center of attraction.

That's a planet. A planet's gravity core (center) is of course the center of attraction of the planet. And boy, that planet has sure got a big ridge on it. But everybody treats this planet pretty nice. They call it Earth. And they're not too bad to it. But, in essence, this planet is pulling away from space. It's balanced its gravity against the vacuum of space.

And every once in a while you'll run a preclear up to a point where he achieves a balance between the exterior environment and himself, and when he's at that balance he's going to look a lot happier and feel a lot happier. Then you leave him alone and he goes off down the street and he goes home and he hits sound waves. And how are they hitting him? Three hundred and sixty degrees inward. He gets into a hot sunshine – 360 degrees inward. That balance goes by the boards! And all of a sudden he's stuck in his head again.

And then as auditors we say, "Well, now, the Theta Clearing is all right but after you theta clear somebody, why, he's liable to go down Tone Scale and just wind up in the soup again." Part of this is motion. This society itself im-

sensation he's apt to acquire it from the exterior environment. As soon as he starts acquiring it from the exterior environment to any great degree, as soon as he starts wanting low-level feeling instead of high-level looking, why, he's going to deal with these low-toned MEST emotions - sex and that sort of thing. Actually, there's more kick in high-level looking than there is in low-level feeling, any day.

But the thetan can get sensation and it's more or less worked out on the playing fields. He goes a certain distance on the playing field then realizes that some guy is playing for keeps around here. He never realized that. I give you that colloquialism just because that's just about the way he thinks of it when it first occurs to him - "Some guy is playing for keeps." And that means he'll have to do something about it! And of course, there's the trap edge. He just goes right on into revenge! Because he has two mechanisms to solve it: one is just look, and his other mechanism is admiration.

If he could just go on admiring this universe, it would just fall to pieces. It would become old and dilapidated and secondhand in no time. But people keep people from admiring things. One of the damndest things to run into anywhere, from anybody, is "You must not like and you must not communicate with because ..." Of course, there not being any reasons, these "because's" are about the same as punish: "You mustn't communicate with ... They are evil!" Which all adds up to "You mustn't like them. They're bad." "Mustn't communicate with," "mustn't like" are the same thing.

So if you can just stop people from liking other people, interpersonal relationships would go to hell. Why? Not because we have any postulates sitting up above it. It's just because it inhibits the thetan from throwing out admiration. And his own admiration will actually melt down the waves and facsimiles which are made of MEST.

Now, what I'm telling you is quite important. The idea of this little being, or little dot in the middle of a continuous implosion, as long as it's on a planet, is the problem you're having to solve. Because he's in the middle of that continuous implosion with insufficient admiration to do anything about it. It'll cut down his motion, cut down his motion, cut down his motion, cut down his motion. And the next thing you know, he's gotten awfully human. Although you had him up to a Theta Clear,

"Well, being a human being isn't so bad after all."

And you say, "How are you, Joe?"

And he says, "Oh, I don't know."

That's being human.

If you want to accelerate anything as a thetan, just simply go around and admiringly zap somebody.

We get a situation, then, where people get theta cleared or unaberrated and they'll stay that way and then they'll drift back into this speed. And this speed, of course, is trying to compare itself to MEST speed, and MEST speed is the final analysis of it.

This whole idea of "don't have to work" is the same as "don't push away the MEST vectors which are coming in from 360 degrees." And "don't have to work" means to be satisfied to let the patterns which MEST makes exist on every hand untroubled and undisturbed. In view of the fact these patterns are sometimes interesting, but not always interesting, this idea of not working becomes idiotic.

Everybody will dramatize this doggone universe from this entering wedge: Don't put out energy. See that? If you get them to a point where they won't put out energy but will accept MEST energy and make facsimiles of it and then use the facsimiles, you've got the entering edge. And the entering edge is "Accept light with which to perceive." "Use exterior light sources with which to perceive; don't use radar."

I was driving through fog this morning. It was very, very heavy fog. I was clipping along at a pretty good rate of speed. What I was doing actually was radaring the road. Solid metal objects would show up anywhere to two or three hundred feet in advance of the car. I was going to take my foot off the throttle and then fifteen, twenty feet away they would suddenly come in sight. That isn't a trick.

One day I docked a ship in a fog in Boston Harbor without seeing the dock. And this was very easy to do.

There's an old navy story that goes on like this about courses and speeds from the Virgin Islands. They finally get up to the eighteenth or twentieth change of course and speed. The skipper all the time is down in his bunk. He comes up on deck and issues an order and goes down below without even looking at the course. He finally comes up on deck after they've been at sea for about three days, everybody completely lost, including the navigator. He says, "All engines stop." Black night, can't see a thing, fog. "All engines stop." They

stop all engines and he said, "All engines back one. All engines back one." He said, "Port engine ahead one. Port engine stop." Leans over the rail and he says, "Is this the Brooklyn Navy Yard, Pier Two?" Voice comes back up. "Okay. Give us a line."

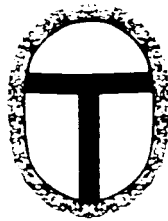

This would look terribly mysterious to people and yet that's the way you ought to be looking. You should have no more dependence on that stuff coming in the window to see this room. It is just idiotic. It's like: "What you need in order to drive a car is a Mack truck, too." And when you get up the line you'll recognize this more and more. You're unwilling to feel at a distance because you've been trained to believe that these things that surround you are so bad. You just don't want to touch these things, because they're bad. Bad? What the heck can happen to you? Nothing! Absolutely nothing!

What I'm talking about then is that your inverted dynamics are from this exact point: the first acceptance of energy from the MEST universe which, of course, is what? The first acceptance of the MEST universe's anchor points as your anchor points exclusively. And from there on it's a rolly coaster. It might take you 74 trillion MEST universe years to run the whole doggone thing. But it's still just one of those things.

That's the first entrance point. The processes to embrace this have to do with resolving implosions, one way or the other; subjectively, one way or the other, which includes just getting up to motion subjectively, and objectively, getting up to motion and then getting space and constructing space. These are the processes.

L. RON HUBBARD, Founder

OTs MAKING A DIFFERENCE

*New OT VIIIs
talk about their wins and
their accomplishments*

**Doug Sadwick, New OT VIII,
DOEC*/FEBC*, Professional FSM.**

I found new abilities as a New OT VIII that I had never dreamed of. This level is "truth revealed." I have found in my daily life that if I get hung up on the lies of the physical universe, a confusion can persist, but only for a short period of time. There is a real positive ability to this level that causes lies to vanish. If I have a situation of any kind it is a certainty that any lie associated with it will disappear. Truth will be revealed in a micro second or a day, but there is absolutely no doubt that

tremendously.

My viewpoint of people around me has changed. I see their truth, their ARC, their ability and their power. With this shift of viewpoint on my part, others have changed, because I see and validate them, and not the lies around them.

I am much freer as a being. As an analogy, I find that the "glue" to the physical universe has totally dissolved and life is just me, as I create it. I have never experienced anything like this before. Life is a great adventure -- every day!

FSM hat. I have achieved the status of Majestic FSM on the FREEWINDS. My wife and I held our own week on the Ship and had all our selectees come and meet us there.

My future plans are to increase the quantity of production as an FSM to a new level, and help LRH on a much larger scale in so doing.

I have realized since doing OT VIII the vital necessity of connecting up with LRH through his spoken and written words. I know there is a lot more to do -- there is a lot more to going free -- and my connecting up with Source gives me the tech I need to expand as a being to create a great future. I really want to help others and to be able to do this for LRH is a joy!

Anthony Men

**"THERE IS A LOT OF
RESPONSIBILITY CONNECTED
WITH BEING PART OF THIS
TEAM OF OTs, BUT IT IS
IMMENSE HAVINGNESS."**

truth will be revealed and the lies will blow.

My life has changed because I have total certainty of myself and the future that lies ahead. The truth of theta is much more real to me than the MEST universe: self-trust, self-respect and the ability to be cause have increased

Since doing New OT VIII I have increased my production on all dynamics. I have been in continuous training at the FSO and have made twelve trips to the FSSO for hatting and for conventions.

As an FSM I have helped a lot of people move on THE BRIDGE from my

**Wendy Ettricks,

Class IV and on the
SAINT HILL Special
Briefing Course,**

Professional FSM from Los Angeles.
New OT VIII answered for me every possible question that I ever had about the Grade Chart and how it fits together. The level is "truth revealed" and it reveals to you the absolute, ultimate truth of life. I felt like a kid again, on every dynamic -- it's the sensation of

everything being exciting, fun and high-toned.

I'm a full-time professional FSM and

RANDY HEPNER

"NEW OT VIII HAS CHANGED MY LIFE IMMENSELY! I'VE DEFINITELY BECOME MORE CAUSE IN ALL AREAS OF MY LIFE."

having completed New OT VIII I had more certainty on the necessity and urgency to do the entire Grade Chart as soon as possible. Therefore I was more effective as an FSM and handling my selectees and reaching out into the public and getting the message out. I had reality on the fact that there are times when someone can appear to be doing so well that he gets a bit complacent about moving faster and geared myself to handling that phenomenon also. The truth of the matter is that getting up to and through New OT VIII, through KEY TO LIFE™ Course, LIFE ORIENTATION™ Course and the L's and making sure you are ready for New OT IX and X, is a vital activity and no delays on this are OK. The power of the tech is incredible!

The release of New OT VIII has made it easier for us to achieve the goals and purposes of LRH. It is completely real that we will clear this planet and being on this latest Maiden Voyage Anniversary really puts there what a strong team we are. It is also very, very real just how important it is that we get trained so we are ready for New OT IX and X. It is very real to me that we are at the beginning of an OT boom and that this Maiden Voyage is where it all started.

As a New OT VIII I am producing like never before. I have a very busy and active life. I'm the mother of a very active 10-year-old. I'm a wife, and a Patron of the IAS. I'm a Cornerstone Member of the SUPER POWER Expansion Project and I'm a full-time FSM. I feel like I can get a tremendous amount done – and I do. I'm very excited about my training and by the time the next Maiden Voyage comes along I know I will be a lot further along and closer to New OT IX and X!

Antonello Moi, New OT VIII, Class IV, Exec Status One, executive and FSM from Italy. New OT VIII has

drastically changed *every single thing* in my life. It boosted me to a very stable and operative OT harmonic, of being able to know simply by being. I have the future in my own hands operating in such a way. After New OT VIII my ARC level for LRH, which was already very, very high – shot way

PAI PAROLDI

"NEW OT VIII HAS CATAPULTED ME INTO A WHOLE NEW BAND OF AWARENESS."

up. I felt fully aligned with every single thing he had written – and I was on a win on this for quite some time.

There were no more reservations on making anything go right and things really do go right – no matter how complex or tangled they may appear. It is totally easy because I am comfortable moving in and out of any universe.

I became a stable terminal for people around me. I helped and continue to help others move on up, just as I have done. I have tremendous satisfaction watching them flourish and prosper.

I am a key disseminator in several areas of SCIENTOLOGY: Como Mission, Milano Org, FSO, the FREEWINDS and IAS.

I have created a big company in only three years which is expanding in quantity and quality and is an example to many. This happened directly and effortlessly after New OT VIII. I am using LRH Admin tech to make this go right all the way.

I am taking responsibility for the Northern Italian field and have caused hundreds to move faster to OT.

Since New OT VIII I find I am totally unreasonable about any thought or stop to the expansion of SCIENTOLOGY in any way.

I have plans in the near future to do technical and administrative training up to Class VIII and FEBC.

I know that we will make it and I know this will occur because of every SCIENTOLOGIST taking the responsibility to move up, get trained and make it all the way to full OT.

There is a lot of responsibility connected with being part of this

team of OTs, but there is nothing of comparable magnitude in terms of the reward of being part of it. It is an immense havingness.

Randy Hepner, New OT VIII, Class V Auditor, airline pilot, from Los Angeles. New OT VIII has changed my

life immensely! First of all I've definitely become more cause in all areas of my life. The biggest thing I've noticed is that my responsibility level has come way up. I used to have back-off but not any more. I can see a situation analytically, give it my best, and pull it off.

Another great win has been on my comm cycle with others – now it's very easy. I am happy all the time – way up tone! Life is simply a game and I am able to play it well and successfully.

My control of my area is better and the people in my area are also better in control. My ethics presence is good. My ethics level is way up and as a result the overall ethics level in my area has come way up.

I have been on training and like everything else in my life, training is easier since New OT VIII. I am working on my prerequisites for New OT IX and X, and it's going well. I am also working on getting others onto this training so that they do make it all the way to full OT.

I have done more on the Third Dynamic since New OT VIII than ever before. I am in the *What Is Scientology?* book. I recorded some of my SCIENTOLOGY wins for TV commercials. I have dramatically increased my FSM activities. As a pilot I fly opinion leaders around the world and I disseminate to them. I plan to do much more of all of this in the coming year!

Chris Gerson, New OT VIII.

Personally, I experienced as much change on New OT VIII as I did from taking my first step in SCIENTOLOGY through New OT VII. One of the most amazing things about New OT VIII and one of the most stable gains is my affinity for mankind. Often times when we move up THE BRIDGE we are handling life and our own postulates and counter-intention. New OT VIII is different. It is the first OT level and LRH gave us back our ability to truly care for everyone on the planet and ensure their survival.

New OT VIII has created a very widespread effect on the OTs in our field working together in various aspects of dissemination. This includes all OTs, not just New OT VIIIs. We have a fairly high number of New OT VIIIs in our area and that has certainly helped!

CHRIS GERSON

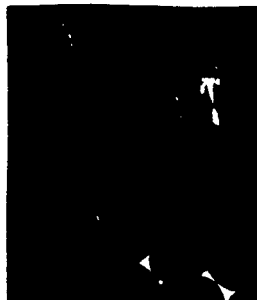

"NEW OT VIII OPENED THE DOORS FOR ME! THE PRODUCTS A NEW OT VIII CAN ACHIEVE WITH MINIMUM EFFORT IS ASTOUNDING!"

New OT VIII opened the doors for me! The products a New OT VIII can achieve with minimum effort is astounding! In a very short time I have opened up an LRH education facility for non-Scientologists under the Applied Scholastics license and over 50% of our public are being introduced to LRH for the first time! Additionally, I had the privilege of going to Russia with a team of New OT VIIIs to deliver the first check-sheeted LRH materials ever in the former USSR. As a result of these efforts, I was awarded Power FSM at the New Year's event. This was a big win for me.

I am working with another New OT VIII, Pam Barton, and we are giving study tech seminars to raw public to introduce them to LRH tech. The seminars are a lot of fun and the

reaction has been great. The privilege of being a New OT VIII has brought with it the ease of helping others.

Since completing New OT VIII

SHEILA AND LARRY GLUCK

"IT JUST BEGAN AFTER WE DID NEW OT VIII. WE HAD NOTHING BUT SUCCESS FOR FOUR YEARS – ONE SUCCESS AFTER THE NEXT."

dissemination is just a natural part of my life.

The future is very bright for DIANETICS and SCIENTOLOGY. I am planning big expansion for my field group this year in addition to the study seminars we will be holding and any trips I might make to pioneer areas. The most important thing any of us can do is spread the word about LRH and his technology. People want to know, and there is no greater acknowledgement to LRH than to help other people discover DIANETICS and SCIENTOLOGY.

win because I'm an artist, not an administrator, and I did it just using the ethics conditions.

For the future, we are going to

complete our HUBBARD KEY TO LIFE Course and then LIFE ORIENTATION Course. Then we will do the new NED for OTs rundowns and train so we can audit. We are going to continue to expand our art school and through that get a lot of people into SCIENTOLOGY!

Sheila: Our success is so great, I said to Larry, "We can't do anything wrong!" Even if we do something wrong or which seems to be wrong, it turns out to be totally right!

And our children just completed their STUDENT HAT and PURIFICATION RUNDOWN. They are both involved with us in the art school.

Linda Neilsen, New OT VIII, on SAINT HILL Special Briefing Course.

There is a lack of "seriousness" that underlies everything I do. The feeling of lightness began while auditing the level and those wins have remained a part of me. It's not to say that situations don't arise which move me on the Tone Scale, but I would say that at all times, I can bounce back when I look at what is going on and I can handle it at will.

The change for me between New OT VII and New OT VIII was astonishing. I had never dreamed that an auditing level could be so utterly simple yet have such a profound effect on beingness. It felt like I had received the greatest rewards for making it to the top of THE BRIDGE. Every step was hard won and so worth it after auditing New OT VIII.

I have had the greatest wins with the children in our school and tutoring center. There are a lot of challenges that kids can present and often times their cases are laid bare on a daily basis. My tone level and ARC regulate their activity. Being New OT VIII makes the job of educating them very easy.

My biggest accomplishment has also been in the field of education and children. New OT VIII has enabled me to make good effects in these areas.

Also, my basic purpose is to make SCIENTOLOGY well known and well thought of.

We have quite a game ahead! I plan to continue in the field of education and to disseminate study tech and SCIENTOLOGY. I will be completing the SAINT HILL Special Briefing Course which will aid with dissemination. It is quite a win to have made it through New OT VIII, but I'm only halfway there! The training through Class VIII needs to be accomplished.

Pat Parodi, New OT VIII, Field Staff Member. Being New OT VIII has catapulted me into a whole new band of awareness, of my own universe and of the universes of those around me. I am much more in comm, much more willing to reach and in a newly revitalized spirit of play.

I have observed New OT VIIIs have had a huge effect in our area - Los Angeles. They are joining the Sea Org, or joining staff at Class V Orgs, others are FSMing, or working with WISE. The New OT VIIIs are very active!

I am now working with new people to DIANETICS and SCIENTOLOGY, FSMing to get people into CELEBRITY CENTRE® International or Los Angeles Org.

These stories from the OT VIIIs are typical of the kinds of activities that have occurred since New OT VIII was released. The activities to get all SCIENTOLOGISTS up to full OT is the mainstream action and like the New OT VIIIs featured above, it is vital that you take your next step on the processing and training Bridge so you are ready for New OT IX and X.

3. If you are a New OT VII complete the New OT VIII TRUTH REVEALED™.

4. Attend a SCIENTOLOGY convention or event (see the schedule on the insert with this magazine).

5. Have a fabulous vacation in an OT environment among other SCIENTOLOGISTS.

6. Simply come for a visit. That is a perfectly good reason to come to the Bridge.

OT Achievement Award recipient Holger Hackenjös New OT VIII

Freewinds: How has New OT VIII changed your life?

Holger: After New OT VIII, I really started to play MY games, big games, on the third dynamic, without any considerations that something could not work.

Freewinds: How has doing New OT VIII affected the people around you in your life?

Holger: In my life and on all my dynamics, everything has turned upside down and changed around to the way

**"THERE IS NO LIMIT
TO SCIENTOLOGY
EXPANSION. IT ONLY
DEPENDS ON HOW
WELL WE WORK
TOGETHER AS A
TEAM."**

I wanted it. Finally, the dynamics were all totally aligned. This gave me more expansion than ever before and of course was more fun.

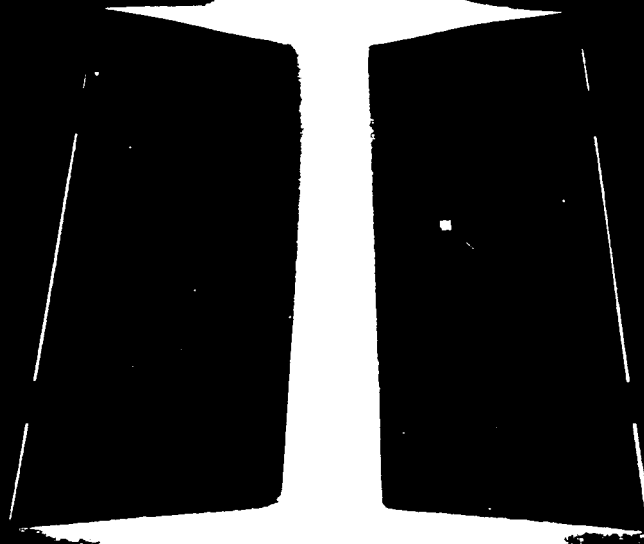

Freewinds: Since achieving the state of New OT VIII, how have you contributed to the expansion and dissemination of SCIENTOLOGY?

Holger: I am successful on staff at Hamburg Org as the D/CO Dissemination for Special Projects, and am a happy member of the best team there is, helping to especially expand the Eastern Block countries. We have built up two city offices for Hamburg in Czechoslovakia, and a DIANETICS group in Poland. I have delivered seminars and lectures about DIANETICS and SCIENTOLOGY to 12,000 people.

The future plans are to build up several Class V Orgs in Czechoslovakia and some city offices in Poland. Also, I want to work in Russia to help build groups and orgs, which is basically very easy to do using OEC training I have done, along with the SAINT HILL Special Briefing Course which I am currently on.

The acknowledgement I have received as an OT with this award was like a booster to go further with even more speed.

There is no limit to SCIENTOLOGY expansion. It only depends on how well we work together as a team. That's what I want for the future, building up functioning and proper teams to make this world a better place to live in.

At the point you complete New OT VII you are ready for your first actual OT level - New OT VIII. This is what your whole Bridge has been leading up to.

New OT VIII (The Reality) is like nothing that has come before. Suddenly your concept of time, the future, the past and bodies just shift. Suddenly there is no other game but the game you're playing.

New OT VIII gives stability and straightforwardness of course that never leaves, never shifts, and emerges with a confidence and assurance that is there forever. You will get this in the next weeks.

"You will enjoy New OT VIII when you do it. It is uniquely addressed to YOU. I don't want to mention too much at this time, but I will tell you that it addresses a vital necessity for a thetan's total freedom: I have discovered the primary reason for amnesia on the whole track, and believe me, this you need to handle."

**- L. RON HUBBARD
Ron's Journal 39**

the importances of being a thetan in this universe change. The million billion things that seemed so important before become insignificant and the true importances are apparent. Life is a lot simpler, one is not worried about the body, this lifetime, last lifetime. You're just a thetan, you're you.

New OT VIII is delivered only aboard the Bridge by the highly trained New OT VIII delivery team.

Exteriorization and the Phenomena of Space Course – never-before-released OT data now available on the Freewinds

The subject of Scientology is to some degree developed in reverse order. The task was to undercut the current level of man and this was the general target. Therefore one finds the higher levels publicly spoken of most frequently in the earlier books and tapes (between 51 and 55).
– L. Ron Hubbard
HCOB Scientology, Current State of the Subject and Materials

On the sixth of October, 1953, a select group of ten auditors, handpicked by L. Ron Hubbard, attended the opening lecture of an exclusive course covering the latest breakthroughs and most advanced techniques on the subject of exteriorization.

1953 had been a year of enormous progress in SCIENTOLOGY technology, with Ron's release of the Factors and a brand new auditing procedure based upon them. A primary factor that Ron worked to solve at that time was the thetan not being able to operate as he should, due to being in a body. And so, when he announced in the summer of 1953 that he would personally train a number of top-notch auditors on these new techniques he was flooded with applications. He accepted only ten to allow intensive personal direction

and attention for each.

The eighty-four lectures which were delivered to these auditors contained OT data on the subject of

unveiled the lecture series and the course. (The course is available only to OT III's and above. The lecture series is available to anyone

**"I'LL TELL YOU VERY BLUNTLY THAT THE BEST DISTANCE TO BE BACK OF ONE'S HEAD IS PROBABLY A COUPLE, SIX OR EIGHT OR TWENTY OR A COUPLE OF MILLION LIGHT-YEARS. THAT'S THE BEST DISTANCE TO BE BACK OF ONE'S HEAD – WAY UP THERE."
– L. RON HUBBARD**

LECTURE 9: EXTERIORIZATION AND THE PHENOMENA OF SPACE

exteriorization. And unknown to those original students, it would be another forty years before the tapes and the course would be available to other SCIENTOLOGISTS as they progress on their way to full OT states.

The release of the Exteriorization and the Phenomena of Space Course aboard the FREEWINDS on 6 June 1993 puts the full data on exteriorization into the hands of pre-OTs and OTs for the first time.

Commander Ray Mithoff, Senior C/S International

at any case level.)

"This series of OT lectures is really the follow-up to the Philadelphia Doctorate Course lectures," Mr. Mithoff said. "They give a very extensive coverage of exteriorization – how to exteriorize a person, how to maintain a state of being exterior and the basic theory on it. LRH points out that there is absolutely nothing HOLDING a thetan in the body. He covers the importance of a thetan's ability to control, and how times you had an inability to control can affect your ability to exteriorize."

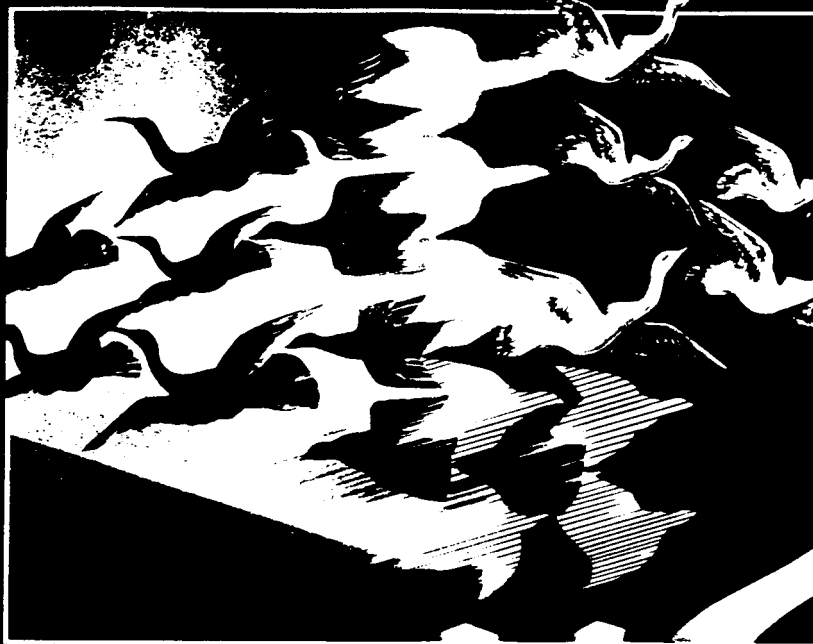

This FREEWINDS OT Hatting Course covers truths that are intimate to any being. Ron explains the relationship between self-determinism and a person's geographical location, the best way to really know something, how a thetan creates space using anchor points and how to get out of a fixed position of a body. He discusses the traps a being has gotten himself into and how to escape them. He explains the eighth dynamic. He gives the tech on how to exteriorize a thetan and audit him while exterior – then how to get him to handle space and energy.

Mr. Mithoff explained that the course is essential to anyone who wants to make it to full OT. He closed by saying, "But I'll tell you something that is particularly relevant to these tapes, which have to do with exteriorization: AS YOU MOVE UP THE BRIDGE AND THE OT LEVELS, PAST NEW OT VIII, YOU WILL REACH A POINT ON THE OT LEVELS WHERE IT IS VITALLY NECESSARY TO GO EXTERIOR AND BE EXTERIOR STABLY. Working within the confines of a body is a real barrier. Exteriorizing and operating separate from the body is very much a part of the upper OT levels and is data you absolutely need to know."

The reality of full OT begins aboard the FREEWINDS for pre-OTs on the Exteriorization and the Phenomena of Space Course. Ron's data is now available to all SCIENTOLOGISTS as they journey up THE BRIDGE to total freedom.

NOTICE: BE PREPARED TO EXPERIENCE OT PHENOMENA WHILE LISTENING TO THESE LECTURES.

FIRST AMERICAN ADVANCED INDOCTRINATION COURSE LECTURES, CAMDEN, NEW JERSEY

"The technique which returns the person his personality is exteriorization. The technique which adjusts the anxiety and troubles and inability to handle anchor points is exteriorization."

— L. Ron Hubbard

Lecture 3: Exteriorization

In October of 1953, the top ten auditors of Scientology attended the opening lecture of an exclusive course which covered the latest breakthroughs and most advanced techniques on the subject of exteriorization.

Over an intensive period of five and one half weeks, Ron delivered a total of eighty-four lectures which contained the knowledge of how to operate exterior to the body — and remain exterior.

The ten students who experienced these lectures were indeed privileged, for another forty years would elapse before extensive work and meticulous care would restore the original recordings for others to hear.

Exteriorization and the Phenomena of Space is the most comprehensive reference on exteriorization available anywhere.

Never before released, these lectures are filled with data you *must* have to operate as an OT. Ron provides intimate truths about YOU as a being:

- How a being creates space using anchor points
- How to get out of the fixed position of a body
- The traps you have gotten yourself

into and how to escape them

- How to rehabilitate abilities as a thetan to create, use, direct and locate energy
- The relationship between self-determinism and your geographical location.

All eighty-four lectures are contained in eight binders, including full transcripts and glossaries of hard-to-find words.

No matter where you are on the Grade Chart, you need these lectures so that you can master the phenomena of space and operate on OT truths. Your future as an OT depends on knowing and using this knowledge!

THE OT E-METER

When auditing on the Solo levels, including New OT VIII, the exact read on the E-Meter dial is very important. To ensure you get the full gains of the miraculous pre-OT and OT levels requires the computer precise Hubbard Professional Mark Super VII E-Meter.

The Mark Super VII E-Meter reads deep into the OT band and, with complete clarity, guides you along LRH's exact path that you must follow to attain OT.

There is an exact route and that route is marked with E-Meter reads. With the Mark Super VII and four standard metering, you will find each read.

The Mark Super VII never misses a read, which means your route to OT is secure. It responds instantly and precisely to the upper level auditing you'll be doing.

You will find you can audit with confidence with the Mark Super VII.

Get the Remote Tone Arm for Solo auditing. The matching Remote Tone Arm was designed to make Solo auditing easier. It helps make Solo sessions smoother and distraction free.

The Mark Super VII E-Meter comes with a complete set of accessories including a custom carrying case, folding admin shield, custom corrosion free electrodes in five sizes, dividers for Solo leads, charging cord, a set of calibration resistors, and a two year Silver Certificate warranty.

THE FREEWINDS COMMEMORATIVE EDITION MARK SUPER VII

Designed for Freewinds, commemorating the release of New OT VIII. The E-Meter shield and E-Meter are cast in deep burgundy. The E-Meter comes in a sleek graphite gray Zero Halliburton carrying case lined in gray velvet. Available only from the Freewinds.

Freewinds passes through the Panama Canal – and reaches its 100,000th mile of safe cruising!

In May of this year the FREEWINDS made a historic passage through the Panama Canal and while in the Canal, sailed her 100,000th mile of safe cruising! (top) For their accomplishment the FREEWINDS Captain and his officers were awarded a commemorative plaque by International Management during the 5th Anniversary of the Maiden Voyage. (left) The FREEWINDS, seen here at Gaillard Cut on the Panama Canal, made her passage through the canal in 6 hours, a record for a cruise ship. (below) The FREEWINDS being guided into the Miraflores Locks by locomotives called "mules."

FREEWIND'S HISTORIC TRANSIT THROUGH THE PANAMA CANAL TO THE PACIFIC OCEAN!

The sun broke over the horizon to warm the cool morning air as the FREEWINDS approached Limón Bay, the entrance of the Panama Canal, ready to begin her 51-mile inland voyage between the Atlantic and Pacific Oceans.

Passengers collected on deck, eager to be part of the historic occasion. A small boat approached and a Panama pilot was welcomed on board – a personal friend of the FREEWINDS Captain, Mike Napier, and one of the senior Canal pilots.

The Panama Canal is the only waterway in the world where the skipper of the ship gives over navigational control of the vessel to one of a group of 265 elite pilots who guide ocean liners through the passageway.

The course through the

canal can be a challenge, with thick fogs, narrow shipping lanes, shifting water currents and unpredictable winds, and it normally takes 8 to 12 hours to traverse.

The Marine Director of the Panama Canal Commission was amazed when the FREEWINDS smoothly passed through in only 6 hours, one of the fastest transits in the history of the canal for a cruise liner.

To reach the Pacific Ocean, the FREEWINDS had to pass through six locks – sections of waterway closed off with gates. Half of the locks raise the ship 85 feet into the waterway on the Atlantic side of the canal, and the other three drop the ship back to sea level on the Pacific side as she exits.

On her way through the canal, the FREEWINDS traveled Gatun Lake, the largest man-made lake in the world, surrounded by

lush jungle growth.

A presentation was made by Canal officials to commemorate the Freewinds' inaugural trip – a plaque with a piece of the original chamber floor of the Panama Canal.

As the FREEWINDS came out of the last set of locks, she cruised past the gleaming silver skyline of the city of Panama and passed under the Bridge of

the Americas – signifying the completion of the first Panama Canal transit. Passengers and crew broke into cheers.

This point of the passage marked yet another milestone for the ship: The FREEWINDS had just traveled her 100,000th mile at sea – a fitting accomplishment for the 5th Anniversary of her Maiden Voyage!

THE PERFECT ENVIRONMENT

The FREEWINDS is off the main crossroads of the world and offers the ideal OT environment for a business convention, conference, celebration, or event – even a beautiful and memorable wedding.

The FREEWINDS has facilities for your every need:

- Five-star restaurants and catering
- A fully appointed conference room
- The elegant Starlight Cabaret and beautiful La Paloma Blanca Lounge
- A complete business center.

Contact your nearest FSSC Office on scheduled events, seminars and conventions, or for help planning your own personal event on the FREEWINDS.

Auditors! Gain 100% certainty on the application of tech

THE ROUTE TO INFINITY

L. RON HUBBARD

OT Hatting Course helps Clear to get to OT

In September of 1988 I was part of a group of about a dozen from Sterling Management that went to the FREEWINDS. I did the Route To Infinity OT Hatting Course and was totally blown away at being on the FREEWINDS.

At that time I was Clear. I watched Wayne Fuller go through his New OT VIII Course and when he actually audited on New OT VIII, I could see that he was having a good time!

So I put the data of Route to Infinity to work.

First, I had a big win on the way home. My connecting flight from Miami to Atlanta was late and I had to make another connection at Atlanta for Athens, Georgia. I arrived in Atlanta fifteen minutes late for my connection, but I had total knowingness I was going to make it. I postulated that my bag would come up the baggage elevator immediately and

that I would simply make it onto the shuttle.

It went exactly as I had postulated. Up came my baggage just as I had visualized. The plane was delayed by a flat tire, and I made the shuttle!

I am a veterinarian and from May 1988 to May 1989 I held my practice alone. Then I started to apply LRH Admin Technology and got up into Power. I then hired two veterinarians, hatted them

and went off to do my OT levels in August of 1989. I came home for a month in December and handled some backlogs and then went back to Flag just before New Year to do New OT VI. I was home in February 1990 auditing on New OT VII!

Now I am New OT VIII!!!!

My son is another success story. He just completed his FLAG Executive Briefing Course at International Training Org in Los Angeles! He is on the Solo Course at AOLA and is going to be an executive in the Atlanta Org – one of the teams that Chairman of the Board RTC mentioned recently as almost ready to fire home to Atlanta.

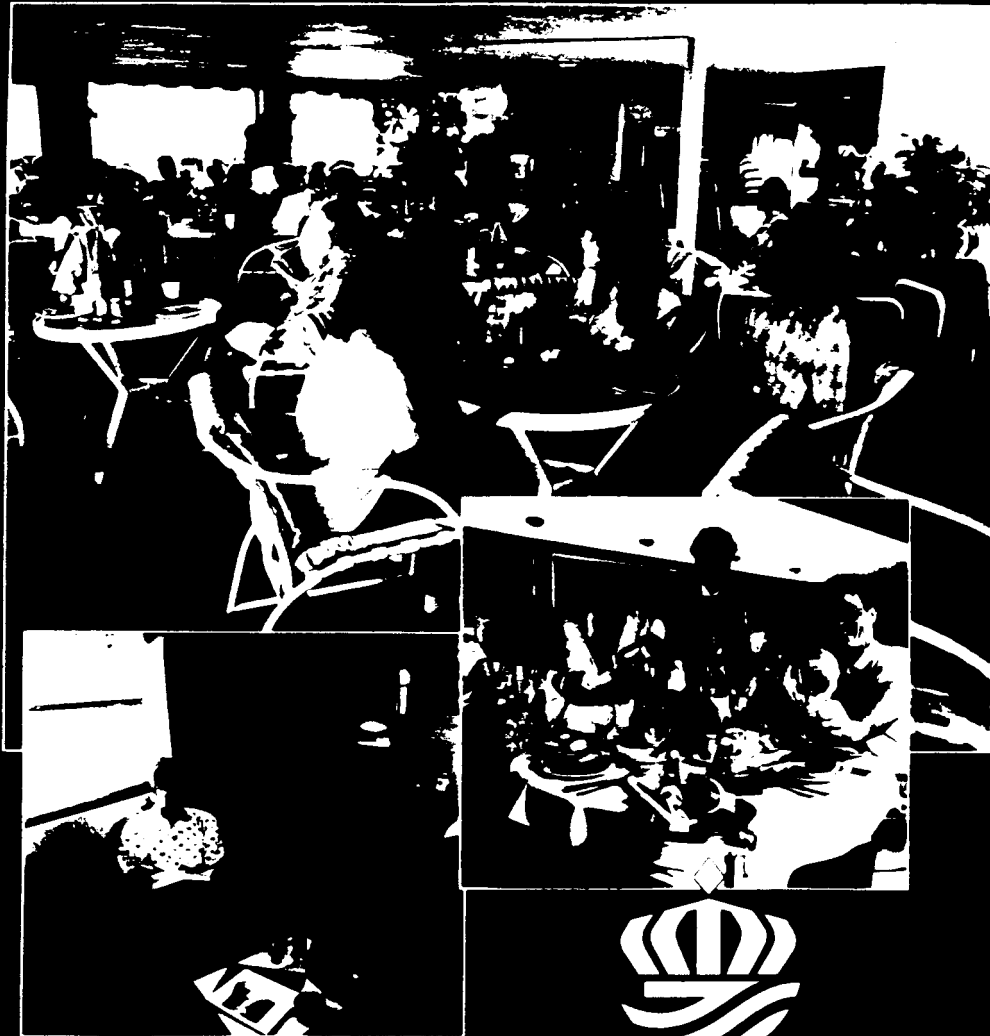

I highly recommend OT Hatting Courses. They give you data that can get you up to OT faster and it is data you will definitely need as an OT!

– George Malnati

Rotisseurs," the world's oldest and most famous gourmet society.

It is the perfect environment to enjoy the fabulous wins of New Orleans and the fabulous Old Hatting Courses.

There has never been anything like the Freewinds experience. Share it with us now.

Get vital OT data you must have to achieve full Operating Thetan

OT Hatting Courses are delivered only on the FREEDOMS. They not only can speed personal progress to OT, but they are vital if one is going to reach full OT. These courses can be done by SCIENTOLOGISTS of any case level, except the Doctorate Series Course for OTs and the Exteriorization and the Phenomena of Space Course which have the prerequisite of OT III. The only training requirement is STUDENT HAT study course.

The Route to Infinity Course. Approach infinite beingness and ultimate ARC. 3 days full time.

State of Man Congress Course. Find out why a being loses his most creative abilities and how these can be restored. 4 days full time.

The Solution to Entrapment. Find out how a thetan gets trapped and how to undo the traps he created. 10 days full time.

Ability Congress Course. This is how to rehabilitate and improve your own ability. 3 days full time.

The MEST Universe Course. Here are the principles which a being can recover control of his existence in the MEST universe and his use of energy and force. 5 days full time.

The War between Theta and MEST Course. Find out the whole panorama of universes as a thetan.

The Creation of Human Ability Course. Here is how life itself operates, no matter what universe, activity or life form. 12 days full time.

The Perception of Truth Course. Be able to clearly differentiate truth from lies with correct evaluation of data. 3 days full time.

The Anatomy of Cause Course. Open the door to an expansion of beingness across all dynamics. 9 days full time.

The Time Track of Theta Course. Ron's discoveries about the whole track and the often savage history of the theta line, leading to the race known as "man." 3 days full time.

The Whole Track Course. Ron takes you for a tour of some of the wilder parts of the whole track, including many early civilizations. 3 days full time.

The Phoenix Lectures Course. This is how to put the spiritual wisdom of SCIENTOLOGY to work in your life. 9 days full time.

The Power of Simplicity Course. Ron covers in detail the factors of simplicity and complexity - related to create, confront, duplication and a being himself. 12 days full time.

The Doctorate Series Course for OTs. (For OT IIIs and above.) This course contains the secrets of this universe and how to handle it as a thetan. 3 to 4 weeks full time.

Exteriorization and the Phenomena of Space Course. (For OT IIIs and above.)
