WEEKLY REPORT

This week had some good improvements and definitely more field activity took place.

The week began with all of the professional field auditors back onto producing. A new field group formed up in Toronto with [REDACTED] and another FSM.

There has been very good cycles that closed in the field; I am aware of 3 Clear Packages that were sold, plus many other blocks of intensives. I have received lots of originations to form field groups in the LA area.

The CO I HELP WUS GMOS were revised and re-submitted for approval. This was a very good cycle and we definitely enjoyed working with the 2 new SPDs and the planning on I HELP. This aligned all of our actions and functions. This was really needed.

The 3rd ASHO F Auditors Association meeting was held and this is getting very good responses. CC INT is now, as a result of this activity, forming their Auditors Associations too. The ASHO F Auditors Association Sec is picking up the hat and already have an auditor doing the designs of the membership card, membership application form, and onto working out the financial lines with the PAC orgs.

As a note all the field auditors whom we have spoken with, this week, enjoyed the New Years event, comments such as this was the best event ever, Management is great and it is so good to know they are caring, there is no way that I could missed an event now they are so incredible.

Internally it was definitely a better week than last week.

Key stats like GI, Pro Members, Licenses, etc went in affluence. More movement happened this week than the last one.

This morning I discovered that the Snr C/S Int letter was printed on the wrong letterhead and it is under repair at this moment. The letter will go out tomorrow.

I resubmitted the QEI Letter to the Professional Auditors and Field Auditors and as soon as it will be ready it will be printed and sent.

This is all what I think of right now. This coming week is looking very good.
