## **PRINCIPAL ACCOUNTING POLICIES**

For the period ended 3 January 2002

---

### **BASIS OF ACCOUNTING**

The financial statements have been prepared under the historical cost convention.

The principal accounting policies of the Church, which are set out below, have remained unchanged from the previous period.

### **INCOME**

Income is the total amount receivable by the Church for spiritual counselling and religious instruction given to individuals together with materials supplied, donations, and income from related activities provided to other churches and organisations.

### **DEPRECIATION**

Depreciation is calculated to write down the cost of all tangible fixed assets by the straight line method over their expected useful lives.

The annual rates generally applicable are:

Freehold buildings	2%
Furniture, fixtures and equipment	10%
Computer equipment	33%
Motor vehicles	25%

The short leasehold property is amortised over the period of the lease.

### **STOCKS**

Stocks of religious books and artifacts are stated at the lower of cost and net realisable value.

### **FOREIGN CURRENCIES**

Assets and liabilities in foreign currencies have been translated into sterling at the rates of exchange ruling at the balance sheet date.

Exchange differences are dealt with through the income and expenditure account.

### **CONSOLIDATION**

The financial statements of the subsidiary companies have not been incorporated into a consolidated set of financial statements because the Trustees do not consider that the additional expense involved would be of any benefit to the members.

### **DONATIONS RECEIVED FOR CAPITAL EXPENDITURE**

Donations received for capital expenditure are dealt with through reserves.

The Trustees of the Church consider that this policy is necessary to enable users of these financial statements to more fully appreciate the true financial position of the Church, as these donations do not form part of the income from the normal activities of the Church.
